

# PROJECT

# APPLE CLONE

Done By:

AMAN VERMA

# SUMMARY :

## 1. HTML (index.html):

- The main structure of the website is defined here.
- Includes a header with navigation links (e.g., Store, Mac, iPad, iPhone, etc.), a search icon, and a shopping bag icon.
- Contains sections for:
  - A donation banner with an image.
  - Product showcases for iPhone 16 Pro, iPhone 16, and Apple Watch.
  - A grid layout for additional products like MacBook Air, iPad Pro, AirPods Pro, etc.
  - A slider showcasing promotional images.
  - A content section with detailed information and disclaimers.
  - A video element for an introductory video.

## 2. CSS (stylesheet.css):

- Provides styling for the website, focusing on a clean and modern design.
- Implements responsive design using media queries for smaller screens.
- Uses grid and flexbox layouts for structured and responsive sections.
- Includes hover effects for buttons and animations for the slider.

## 3. Assets ([images](#)):

- Contains images and a video used in the website, such as product images, promotional banners, and a favicon.

## 4. Features

- **Header Navigation:**
  - Sticky header with navigation links and icons for search and shopping.
- **Product Showcase:**
  - Highlighted sections for flagship products like iPhone 16 Pro and Apple Watch.
  - Buttons for "Learn More" and "Buy" with hover effects.
- **Image Slider:**
  - A continuously scrolling slider showcasing promotional images.
  - Pauses on hover.
- **Video Integration:**
  - An autoplaying video that hides after the first play using session storage.
- **Responsive Design:**
  - Adjusts layout and visibility of elements for smaller screens.

## 5. Purpose

The project is likely a practice or demonstration of front-end development skills, showcasing:

- HTML structure and semantic elements.
- CSS styling, animations, and responsive design.
- Integration of multimedia elements like images and videos.
- Use of modern web design techniques inspired by Apple's aesthetic.

This project is a visually appealing and functional website that mimics a professional product showcase.

# COLOR THEORY:

This project primarily relies on **images** for visual appeal, with minimal use of colors to maintain a clean and modern design. Here's a brief overview:

## 1. Neutral Backgrounds:

-  `rgba(245, 245, 247, 0.8)` (Light Gray with Transparency) is used for sections like the header and donation banner to create a subtle, clean look.

## 2. Text Colors:

-  `rgb(37, 35, 35)` (Dark Gray) for navigation links and text.
- white (`rgb(255, 255, 255)`) for text on dark backgrounds.

## 3. Accent Colors:

-  `rgb(77, 77, 248)` (Bright Blue) for buttons like "Learn More" and "Buy," drawing attention to call-to-action elements.

## 4. Hover Effects:

- Buttons change to white or  `rgb(77, 77, 248)` on hover for interactivity.

## 5. Images:

- The design heavily uses **high-quality images** for product showcases (e.g., iPhone, Watch, MacBook) and promotional sections, making visuals the primary focus.

This minimalist approach aligns with Apple's aesthetic, emphasizing products over decorative elements.

# TYPOGRAPHY:

## 1. Font Size:

- **Header Links:** font-size: 14px; - Small and clean for navigation links.
- **Donation Section:** font-size: 18px; - Slightly larger to grab attention.
- **Product Content:** font-size: 30px; - Large and bold for product titles and descriptions.
- **Buttons:** font-size: 15px; - Readable and consistent for call-to-action elements.

## 2. Font Weight:

- **Buttons:** font-weight: bold; or font-weight: 550; - Emphasizes clickable elements.
- **Content Text:** Regular weight for readability.

## 3. Text Alignment:

- **Centered:** Most sections use text-align: center; for a balanced and clean layout.
- **Start Alignment:** Used in paragraphs (text-align: start;) for better readability in longer text blocks.

## 4. Color:

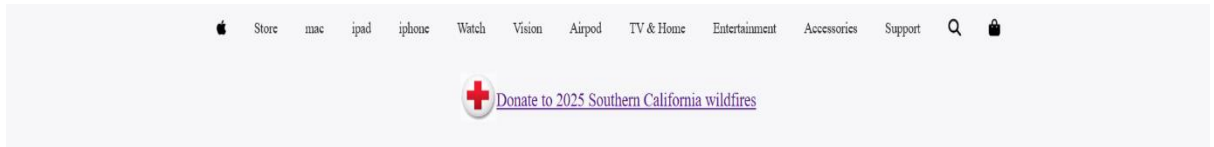

- **Dark Gray** (  rgb(37, 35, 35) or  rgb(41, 36, 36)): Used for text on light backgrounds for high contrast.
- **White** (  rgb(255, 255, 255)): Used for text on dark or image backgrounds for visibility.

## 5. Responsiveness:

- Font sizes are adjusted for smaller screens (e.g., .iphone16pro-content { font-size: 10px; }) to ensure readability on mobile devices.

The typography is simple and functional, aligning with the minimalist design and focusing on readability and clarity.

## 1. Header + Donation Section:

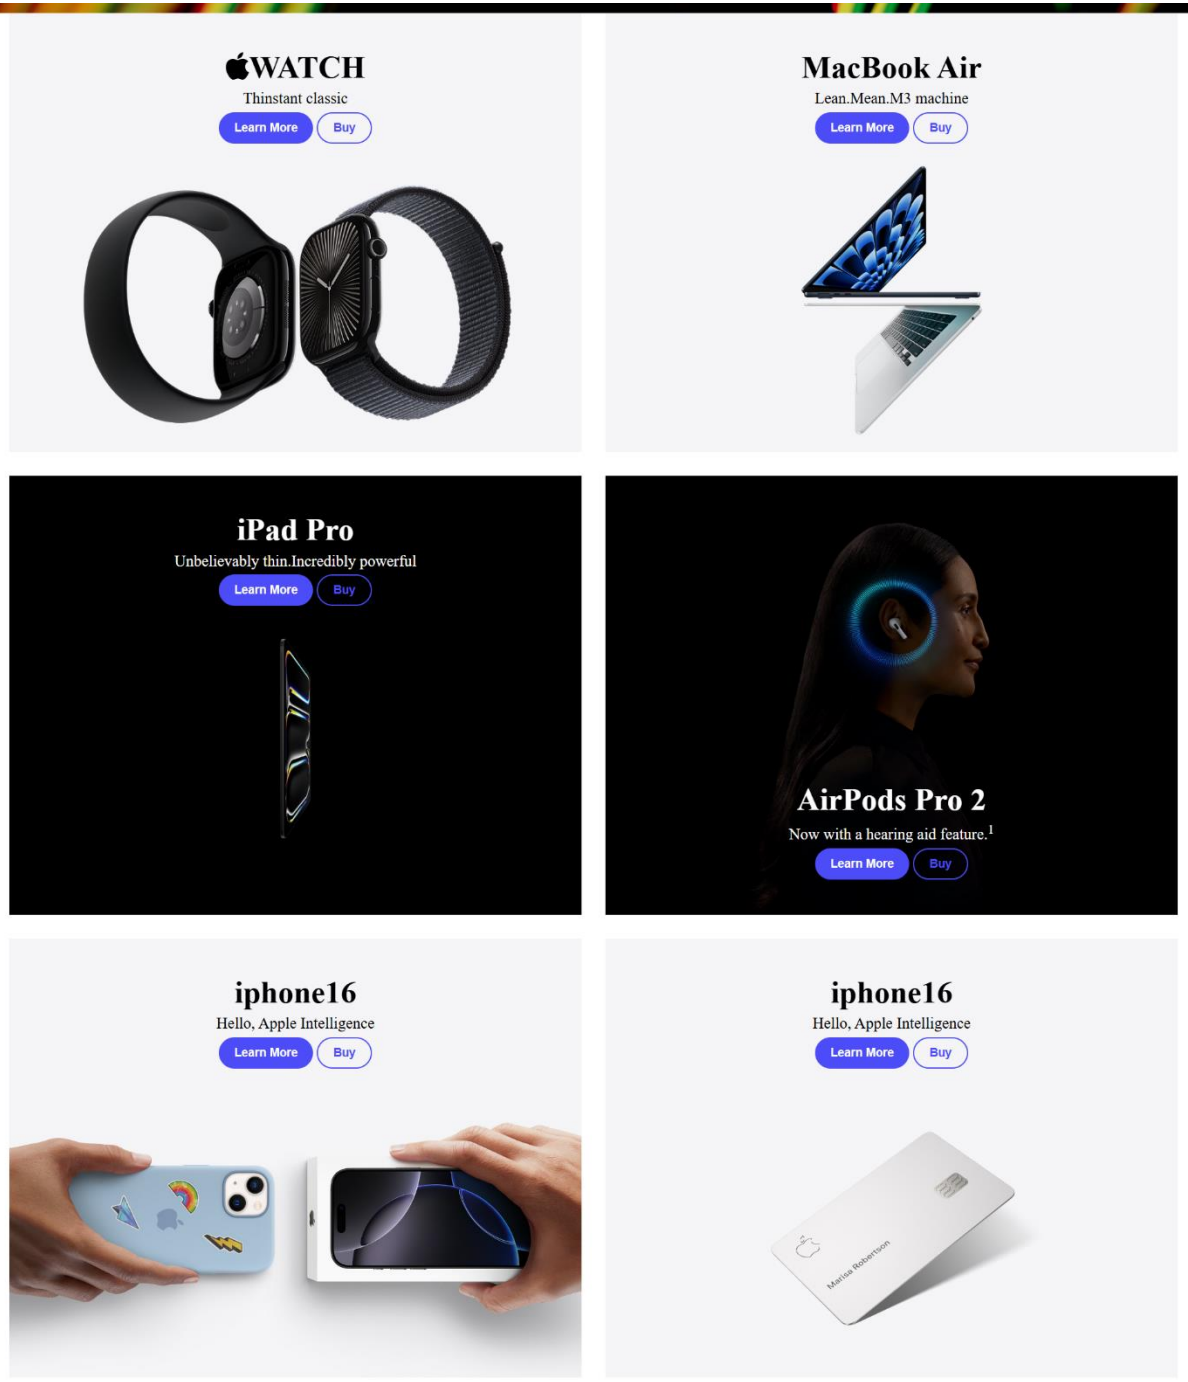

- **Sticky Header:** Positioned at the top using position: sticky, to remain visible during scrolling.
- **Navigation Links:** Styled with text-decoration: none; and color: rgb(37, 35, 35); for a clean look.
- **Donation Banner:** Includes a **centered image** and **text**, styled with **flexbox** for alignment.

## 2. Product Showcase (iPhone 16 Pro, iPhone 16, Watch):

- **Background Images:** High-quality images set using background-image for each product.
- **Call-to-Action Buttons:** "Learn More" and "Buy" buttons with **hover effects** for interactivity.
- **Flexbox Layout:** Ensures content is **centered** and **aligned** properly.

### 3. Grid Layout for Products:

- **Parent Grid:** A structured grid layout using grid-template-columns and grid-template-rows for showcasing multiple products.

- **Responsive Design:** Adjusts to single-column layout on smaller screens using media queries.

## 4. Image Slider:

- **Continuous Animation:** Uses @keyframes slide for infinite horizontal scrolling.
- **Pause on Hover:** Animation pauses when the user hovers over the slider (animation-play-state: paused;).

## 5. Content Section:

1. Hearing Aid and Hearing Test: The Hearing Aid feature has received FDA authorization. The Hearing Test and Hearing Aid features are supported on AirPods Pro 2 with the latest firmware paired with a compatible iPhone or iPad with iOS 18 or iPadOS 18 and later and are intended for people 18 years old or older. The Hearing Aid feature is also supported on a compatible Mac with macOS Sequoia and later. It is intended for people with perceived mild to moderate hearing loss.

Hearing Protection: The Hearing Protection feature works with AirPods Pro 2 with the latest firmware when paired with a compatible iPhone, iPad, or Mac with iOS 18, iPadOS 18, or macOS Sequoia and later. Feature is only available in the U.S. and Canada. See [support.apple.com/120850](https://support.apple.com/120850) for total attenuation and more information. The Hearing Protection feature is not suitable for protection against extremely loud impulse sounds, such as gunfire, fireworks, or jackhammers, or against sustained sounds louder than 110 dBA.

2. Trade-in values will vary based on the condition, year, and configuration of your eligible trade-in device. Not all devices are eligible for credit. You must be at least the age of majority to be eligible to trade in for credit or for an Apple Gift Card. Trade-in value may be applied toward qualifying new device purchase, or added to an Apple Gift Card. Actual value awarded is based on receipt of a qualifying device matching the description provided when estimate was made. Sales tax may be assessed on full value of a new device purchase. In-store trade-in requires presentation of a valid photo ID (local law may require saving this information). Offer may not be available in all stores, and may vary between in-store and online trade-in. Some stores may have additional requirements. Apple or its trade-in partners reserve the right to refuse, cancel, or limit quantity of any trade-in transaction for any reason. More details are available from Apple's trade-in partner for trade-in and recycling of eligible devices. Restrictions and limitations may apply.

To access and use all Apple Card features and products available only to Apple Card users, you must add Apple Card to Wallet on an iPhone or iPad that supports and has the latest version of iOS or iPadOS. Apple Card is subject to credit approval, available only for qualifying applicants in the United States, and issued by Goldman Sachs Bank USA, Salt Lake City Branch.

If you reside in the U.S. territories, please call Goldman Sachs at 877-255-5923 with questions about Apple Card.

Learn more about how Apple Card applications are evaluated at [support.apple.com/kb/HT209218](https://support.apple.com/kb/HT209218).

Apple Intelligence is available in beta on all iPhone 16 models, iPhone 15 Pro, iPhone 15 Pro Max, iPad mini (A17 Pro), and iPad and Mac models with M1 and later, with Siri and device language set to English (Australia, Canada, Ireland, New Zealand, South Africa, UK, or U.S.), as part of an iOS 18, iPadOS 18, and macOS Sequoia software update. Additional features and languages will be available in April, with more languages coming over the course of the year. Languages supported in 2025 include Chinese, English (India, Singapore), French, German, Italian, Japanese, Korean, Portuguese, Spanish, and Vietnamese.

A subscription is required for Apple Arcade, Apple Fitness+, Apple Music, and Apple TV+.

Features are subject to change. Some features, applications, and services may not be available in all regions or all languages.

- **Text-Based Information:** Includes paragraphs styled with text-align: start; and font-size: 13.5px; for readability.
- **Background Styling:** Light background color (rgba(245, 245, 247, 0.8)) for contrast.

# MOBILE-RESPONSIVE

## 1. Header Adjustments:

- Navigation links are hidden on smaller screens using `display: none;`.
- Logo alignment is adjusted with padding for better positioning.

## 2. Product Section Resizing:

- Heights of sections like `.iphone16pro`, `.iphone16`, and `.watch` are reduced to 60vh for smaller screens.
- Font sizes in product content are scaled down for readability.

## 3. Grid Layout Adaptation:

- The `.parent-box` grid switches to a single-column layout (`grid-template-columns: 1fr;`) for mobile devices.
- Row gaps are increased to 25px for better spacing.

## 4. Slider Responsiveness:

- The slider remains functional on smaller screens, with `overflow: hidden;` ensuring it fits within the viewport.

## 5. Content Section Adjustments:

- The `.content` section height is increased to 150vh and text width is adjusted to 85vw for better readability on narrow screens.

**Learning Protection:** The Learning Protection license works with Autodesk Pro 7 with the latest firm now when paired with a compatible iPhone, iPad, or Mac with iOS 15, or macOS Sequoia and later. Further, it is only available in the US and Canada. See [apple.com/learnpro](https://apple.com/learnpro) for the full restrictions and more information. The Learning Protection license is not suitable for protection against criminal conduct, false insurance claims, such as piracy, or e-discovery, or against standard security leaders from 119.021.00.

To enroll and use all Apple Card features and products available only on Apple Card users, you must add Apple Card to Wallet on an iPhone or iPad that supports and has the latest version of iOS or iPadOS. Apple Card is subject to credit approval. Available only for qualifying applicants in the United States, and issued by Goldman Sachs Bank USA, Salt Lake City Branch.

Apple Intelligence is available in beta on all new iPhone 16 models. *Approx. 17 GB. For U.S., iPad mini, iPad Air, iPad Pro, and Mac with M1, M2, and M3 chips with 16 GB or more. For U.S. only. See [apple.com/appleintelligence](https://apple.com/appleintelligence) for more details. Apple Intelligence is available in beta on all new iPhone 16 models. *Approx. 17 GB.
